

Call for Papers
20th International Workshop on
Microprocessor/SOC Test, Security and Verification
(MTV 2019)
Common Challenges and Solutions
December 9-10, 2019, Hyatt Regency Austin, Texas, USA

<http://mtvcon.org>

General Chair: Dr. Magdy S. Abadir – magdy.abadir@gmail.com

Vice-Chair: Prof. Li-C. Wang (University of California at Santa Barbara) – licwang@ece.ucsb.edu

Vice-Chair: Dr. Jayanta Bhadra (AMD) – jayanta.bhadra@amd.com

Program Co-Chair: Dr. Wen Chen (NXP Semiconductor) – wen.chen@nxp.com

Program Co-Chair: [Xiao \(Sean\) Sun](#), NXP Semiconductor

Security Track Co-Chair: Dr. [Sohrab Aftabjahani](#), Intel Corporation

Security Track Co-Chair: Prof. [Sandip Ray](#), University of Florida

THE PURPOSE of this workshop is to bring industry practitioners and researchers from the fields of verification, security, validation and test to exchange innovative ideas and to develop new methodologies to solve the difficult challenges facing us today in various SOC design environments. In the past several years, some work has been done on exploiting techniques from one field to solve problems in the other field, and we believe this trend will continue. This is the 20th edition of the MTV Workshop, a testament to its success in providing an ideal environment for cross- examination of test, security and verification experiences and innovative solutions.

AREAS OF INTEREST include, but not limited to:

- Test/Verification challenges of IoT
- Security verification
- FPGA Security
- Reverse Engineering
- Hardware attacks and security methods
- Performance verification
- High-level test generation for functional verification
- Emulation techniques and FPGA prototyping
- Triage and debug methodologies
- Silicon debugging
- Low-power verification
- Formal techniques and their applications
- Mixed Signal Crosstalk Challenges

- Verification coverage
- Validation of microprocessors and SOCs
- Software verification
- Hardware/software co-design and co-verification
- IP Verification methodologies
- Design for Testability (DFT) or Verifiability (DFV)
- Memory and coherency verification
- Assertion synthesis
- Analog & Mixed-Signal circuit verification
- Machine learning and Data analytics applications
- Innovative EDA tools
- ESL design and Virtual Platforms
- Functional safety analysis and verification

AUTHOR INFORMATION: By the paper deadline authors are invited to submit PDF versions of their extended abstracts or full papers (max 6 pages), with author names, affiliation, addresses, telephone, e-mail address, and the name of the person who will present the work if accepted. The MTV website has instructions on where to submit the papers using EasyChair. At least one author of each accepted paper must register for the workshop and must attend in person to present the paper. Authors of accepted papers have the option to include their papers in the MTV formal proceedings that will be published electronically by CPS and submitted to *IEEE Xplore*. The formal proceedings will get processed right after the workshop. Detailed instructions about the process will be provided at the time of acceptance.

Special Sessions, Panels and Tutorials: Proposals for special sessions, panels and tutorials are also invited. Please email the abstract of your proposals directly to one of the conference chairs.

AUTHOR' SCHEDULE

Paper Submission deadline: Sept 15, 2019

Proposal for special sessions, panels and tutorials deadline: Sept 15, 2019

Author Notification: Oct 10, 2019

Final PDF version due: Nov 15, 2019
